

Mapping Drawing Isolines Name _____

In this activity you will construct isolines on a field map

- Isolines are lines that connect points of equal value
- All points on the same isoline must have the same value
- Isolines never cross, touch or split
- Isolines are always closed curves even though the map might only show a portion of it (the rest is off the map)
- Isolines are gentle curved lines that do not have sharp corners
- Isolines usually are drawn in the same general direction as nearby isolines.

Map A Draw isolines with an interval of 1. Work neatly and carefully

13	15	16	16	18
12	13	14	15	17
11	12	13	14	15
10	12	13	15	16

Map B Draw isolines with an interval of 1. Work neatly and carefully
